

Chapter 8

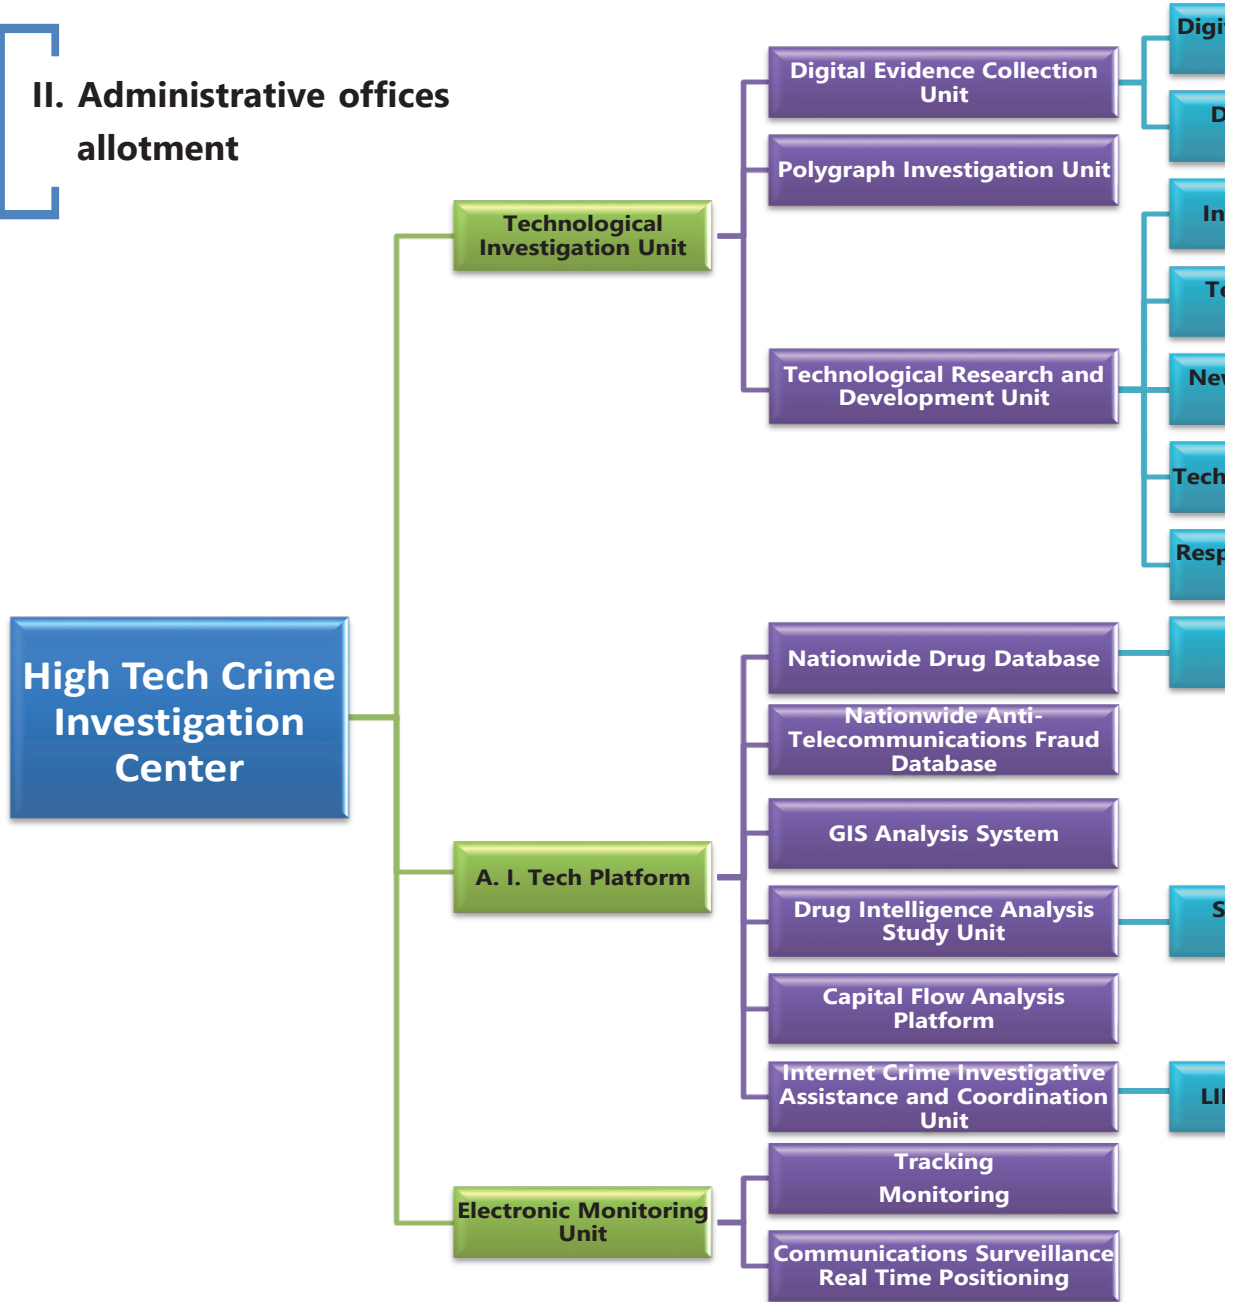

High Tech Crime Investigation Center

I. Preface

With the advancing development of new technologies in the internet, communications, and digital currency dimensions, means and methods of criminality are evolving daily, so law enforcement agencies must be ever vigilant to meet these serious challenges, and also change with the times, to ensure criminal investigations evolving to meet the new scientific and technical advances. In 2017, the Executive Yuan determined to reconsider the entire matter ab initio to promote anti-drug work, and issued the New Era in Anti-Drug Strategic Efforts Initiative, which placed an emphasis on combatting drugs through newly emerging high technology. On January 1, 2017, the Taiwan High Prosecutors' Office established the Investigation Information Center, to invest resources in advancing the capabilities of prosecutorial entities in science and technology assisted investigation, along with integrating judicial police entities and criminal investigative agencies, to promote uses of big data, advance digital evidence collection, and high tech investigative equipment, to achieve joint use of resources and optimal operational efficacy. To strengthen and develop our technological investigation competencies and techniques, our Office in 2020 changed the name to the Taiwan High Prosecutors' Office Science and Technological Investigation Office, and on September 9, 2020, at the Ministry of Justice revealed to the public the new Center's key mission objectives scope of our plans. Our main activities include the Technological Investigations Unit, the Investigations Data Unit, and the Technological Surveillance Unit, which broadly apply all manner of emerging technologies in conjunction with prosecutorial entities existing experience in investigation operations, to continue advancing our development of digital evidence collection, polygraph, big data analysis systems, communications surveillance real time positioning, and responsive measures studies for all forms of technological crime, aiming to push the bounds for exemplary advances in technological investigation. (Written by Head Prosecutorial Affairs Officer)

II. Administrative offices allotment

Digital Information Preservation and Chain of Custody

Digital Evidence Collection Technology Exchange

Science and Technology Investigation Education and Training

Technological Investigation Trend Analysis

Newly emerging technological crime methods analysis

Technology Law Practical Studies

Responsive Measures Simulation Laboratory

Drug Search Engine

Digital Forensics Laboratory

Cyber Crimes Laboratory

Sewage and Drug Analysis Surveillance Plan
